

## Software Developer

Location: Montreal, QC.

Start: ASAP

OmniGlobe Networks ([www.omniglobenet.com](http://www.omniglobenet.com)) is a leading provider of broadband Internet satellite-wireless systems, with software solutions that are designed specifically to perform network management, network monitoring, and bandwidth optimization. OmniGlobe Networks creates and manages 'wireless broadband hot zones', based on WiMax, for remote regions. We have networks and operations in North America, Europe, Africa and the Middle East, each one linked back via satellite to our operations center in Montreal, Canada.

We are seeking a software developer/engineer with JAVA and Web development experience on Unix/Linux.

### Responsibilities

- Software design and implementation using object-oriented approach,
- Software testing and documentation
- Test-bed development

### General qualifications

- Excellent software design skills
- Delivery focus and efficiency
- Good general communication skills
- Able to work in a small team
- Technical writing skills for documentation
- Autonomy

### Knowledge requirements

- Experience with web server and application development using GWT, JavaScript, Java Servlets, AJAX, JMS, SOAP, PHP, XML, Apache and web-containers such as Tomcat.
- Knowledge of middleware platforms such as J2EE, Spring and Inter process communication frameworks.
- Experience with Object-Oriented design and programming using JAVA, log4j, JUnit, Eclipse and SVN.
- Knowledge of IP networking and associated protocols: SNMP, TCP/IP, UDP, NAT, DHCP, DNS, POP/SMTP, P2P.
- Knowledge of network management (NMS/OSS) and telecom
- Knowledge of database applications (MySQL, PostgreSQL).
- Experience with BSD/Linux/Unix operating systems, Linux GNU development tools and shell scripting (bash, perl, ruby, tcl)
- Experience using versioning systems, automated build and test systems.
- Experience in building software distributions using the Red Hat Package Manager and BSD ports collection.

### CONTACT DETAILS:
