

Welcome to the fall edition of the *OmniGlobe Broadband* newsletter - a newsletter designed to bring the latest update on the Rural Connections project directly to your inbox.

This is by far the most exciting edition of our newsletter, and we hope that our decision to combine the August and September editions did not cause any confusion.

Throughout the months of July and August, customers from across Perth County were carefully selected for a 6-week trial period. With the fixed wireless network close to completion, our engineering team was in the position to add “live” users to the *OmniGlobe Broadband* service, and to get constructive feedback on the quality of service. The responses that we received were extremely useful, enabling us to optimize the network, so to all those of you who contributed in making the trial a success, we would like to address a big “Thank you!”

As summer is coming to an end, so is the trial period, but... it is with great pleasure that we can announce that we are now ready to deliver “*broadband to your doorstep*”. Residents and businesses that have registered an interest in the service will be contacted shortly in order to schedule a site consultation. Once the appointment has been confirmed, our certified technician will visit your property to determine the signal strength and to provide advice on the equipment that is best suited to support the Internet service in your area.

Our technicians have been trained in all aspects of wireless high-speed Internet installations, from how to best position your modem to how best to bring the cable in to your building. They will therefore be able to answer any questions that you might have, so please don't be shy.

Provided that the signal strength is good, the technician will then proceed with the installation.

Finally, *OmniGlobe Broadband* is committed to deliver **fast, reliable and affordable high speed services** to remote and rural communities across Canada. With residential packages available from as little as \$49.95 per month, and low installation fees, we are confident that our service is ideally suited for your home and business networking needs. Please do not hesitate to contact us directly on the telephone number listed below and we will be happy to provide you with detailed information about our pricing structure.

Once again, we would like to thank you for your continued interest in our service and we look forward to serving you in the near future.

On behalf of the *OmniGlobe Broadband* team,

*Elsa & Kate*

P.S: To ensure that our technicians are able to arrange an appointment with you promptly and efficiently, please contact us if you feel that the address that you have given us is either incomplete or out of date, and if you need to advise us of any recent changes.
